

Protema DL03709 PRO70 servers

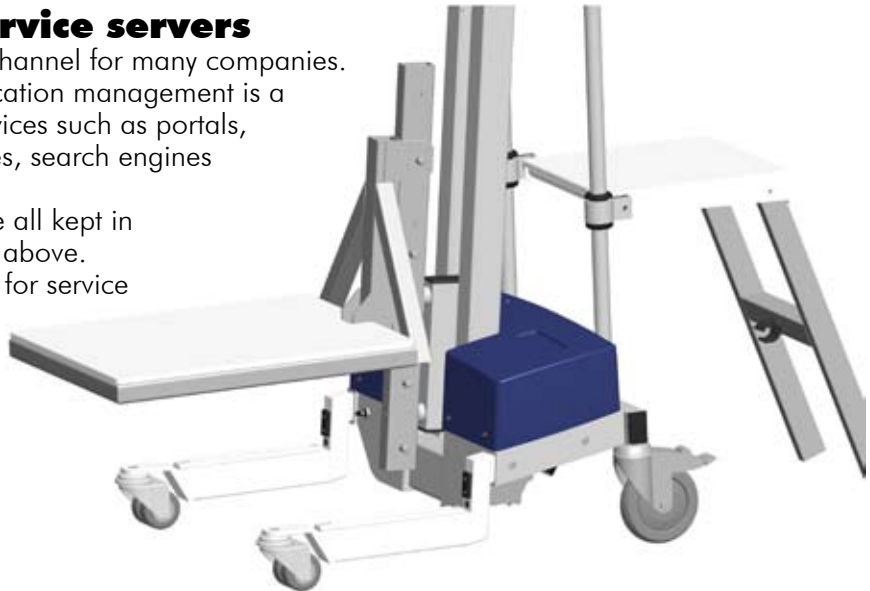

Protema lift used to service servers

Internet serves as a major customer channel for many companies. Therefore, internet hosting and application management is a rapidly growing segment offering services such as portals, online publications, streaming services, search engines and e-commerce solutions.

This demands many servers which are all kept in environments as shown in the photos above.

The Protema PRO70 comes in handy for service and maintenance purposes.

Project number: DL03709

Lifting: Electronic computer servers
