

# Protema PRO120 fork tool for knitting machines

Industry: Textile  
Lifting: Yarning tools  
Used with: PRO120LO with counterbalancing  
Max capacity, this version: 50 kg

This company makes yarn. They lift various reels to make the webbing, goes into a knitting machine. The fork tool is adapted for quick change between the different types of tooling.

Max lifting capacity depends on:

- a) weight of tool
  - b) tool distance from mast
  - c) weight/number of counterweights used
- Contact TAWI for help with these calculations.
